

# Non-Edson Retrofits and Rebuilds Machine Modernizations & Upgrades

Edson specializes in the 3Rs of older machines. Repair, Rebuild, and Replace. Improve productivity through rebuilding existing machinery when new machinery is not in the budget. Edson has experience in rebuilding Non-Edson packaging machines. Modernization or rebuild of in-situ machines provide almost new performance in a third of the time at half the cost of a new machine.

## BEFORE

## AFTER

Rebuilding breathes new life into old machines. If new machinery is not in the budget, let Edson show you how to extend the life of existing machinery through our rebuild program. Your overhauled machine is supported by Edson with spare parts and full service.

We will audit your existing machinery to see if our "Sure-Fit" Change parts can be added in order to run your new product on your existing machinery of all makes and models.

Edson's exemplary machine design & manufacturing process provides the expertise of overhaul, the ability to modernize, existing Edson and other manufacturers packaging automation.

## Rebuild Machine Capabilities

- Reduce change-over time
- Improved Performance
- Decrease Cycle Time
- Servo upgrades
- Meet all local, state and Federal safety standards

✓	<b>SAFETY</b>
✓	<b>PERFORMANCE</b>
✓	<b>RELIABILITY</b>
✓	<b>ENERGY EFFICIENCY</b>
✓	<b>OPERATOR CONVENIENCE</b>
